The **PEMSERTER® Series 4® press** is totally pneumatic providing 6 tons of force and has a 45.7 cm / 18" throat depth which provides clearance for a variety of chassis Configurations. It is designed to install self-clinching fasteners in size M2 thru M10 in steel and stainless and also sizes up to M12 in aluminum panels or circuit boards.

PEMSERTER® presses are designed to safely, reliably, accurately, and quickly install **PEM fasteners**. When using **PEMSERTER presses** to install **PEM fasteners** the entire fastener installation process is streamlined. No matter how complex or simple an installation challenge may be, using the PEM fastener and PEMSERTER press system will provide you with quality results.
